

Destined Akinro

Motivated and creative Front-End Software Engineer with years of experience in developing responsive web applications. Skilled in HTML, CSS, JavaScript, and modern frameworks such as React and Next.js. Participated in the HNG Software Development Internship in 2023 and 2024, where I gained practical experience in agile development and team collaboration. Passionate about crafting seamless user experiences, I am dedicated to continuous learning and professional development. Proficient at problem-solving and delivering high-quality solutions in dynamic environments.

Work Experience

Junior Front-End Software Developer

OUTCESS Solutions LTD

April 2024 - Present

- Developed and implemented software solutions for client projects and increased efficiency of the software team.
- Collaborated with cross-functional teams to design and launch web application within the first few months.
- Assisted in the integration of new features, resulting in the reduction of user-reported bugs
- Provided mentorship and guidance to interns, enhancing team productivity and skill development.
- Contributed to the development of the company's EazyDesk website, streamlining communication with clients for issue reporting.
- Facilitated effective issue resolution by ensuring seamless integration of EazyDesk with the software team, improving response times and client satisfaction.
- Assisted in creating the company's CRM website, which registers and tracks productivity for call operations for the company's call center operations.
- Continuously troubleshoot and resolve issues arising during daily use of the CRM, ensuring smooth operation and minimal downtime.

Additional Information and Projects

HNG Software Development Internship (2023)

- Participated in the HNG Internship, a competitive program designed to hone software development skills.
- Collaborated with a diverse team on projects, enhancing skills in front-end technologies such as HTML, CSS, JavaScript, Next Js and React.
- Successfully completed multiple tasks and challenges, demonstrating problem-solving abilities and a commitment to continuous learning.

Simple E-Commerce Site

Tech Stack: React JS, Typescript, Tailwind CSS, Redux Toolkit

- Implemented the front-end using React and TypeScript, ensuring a responsive and user-friendly interface.
- Styled and designed this web application with Tailwind for rapid UI development
- Developed a dynamic shopping cart feature that allows users to add, remove, and update product quantities.
- Integrated localStorage for data storage
- Applied Typescript for type safety and maintainable code.
- Used Axios to handle API requests, ensuring smooth and efficient communication.
